---

As a trainee Projects

1. **Swi Fencing**
- Contributed to redesigning the frontend using HTML, CSS, and PHP for a leading high-security fencing company. Improved user experience through modern design updates.

2. **Carequip**
- Assisted in debugging and enhancing an existing platform for a supplier of home healthcare and medical equipment, ensuring personalized service for Australians.

3. **V12 Footwear Dashboard**

- Worked on the dashboard for V12, a family-run safety footwear manufacturer, focusing on improving functionality and user experience. Gained experience with APIs and Zustand for state management.

4 . Dallcon

- Assisted in fixing UI changes based on client feedback for a leading provider of precast concrete products, enhancing user experience and ensuring alignment with client requirements.

5. Shermac

- Worked on fixing UI changes for a company specializing in engineered vehicles and equipment for the mining, civil, and commercial sectors, improving user experience and aligning with client specifications.

6. Company Website

- Integrated a WhatsApp feature that allows users to navigate directly to a chatbox for instant communication.
